HESI MENTAL HEALTH RN V1-V3 2020 TEST BANKS (ALL TOGETHER)

While interviewing a client, the nurse takes notes to assist with accurate documentation later. Which statement is most accurate regarding note-taking during an interview?

A. The nurse's ability to directly observe the client's nonverbal communication is limited with note taking.

B. Taking notes during an interview is a legal obligation of the examining nurse.

C. The client's comfort level is increased when the nurse breaks eye contact to take note to take note.

D. The interview process is enhanced with note taking and allows the client speak at normal pace.

An adolescent male receives a prescription for an antidepressant drug because he is exhibiting a depressed affect. While the client is taking the antidepressant, which comparison of the client's behavior before and after taking the drug is most important for the nurse to obtain?

- A. His appetite.
- B. The emotional quality of his attitude.
- C. His level of activity.
- D. The interactions he has with others.

A nurse is providing education about strategies for a safety plan for a female client who is a victim of intimate partner violence. Which strategies should be included in the safety plan?

- A. Purchase a gun to use for protection.
- B. Establish a code with family and friends to signify violence.
- C. Plan an escape route to use if the abuser blocks the main exit.
- D. Have a bag ready that has extra clothes for self and children.

While setting in the dayroom of the mental health unit, a male adolescent avoids eye contact, looks at the floor, and talks softly when interacting verbally with the nurse. The

Following discharge teaching, a male client with duodenal ulcer tells the nurse he will drink plenty of dairy products, such as milk, to help coat and protect his ulcer. What is the best follow-up action by the nurse?

- Review with the client the need to avoid foods that are rich in milk and cream

2. A male client with hypertension, who received new antihypertensive prescriptions at his last visit returns to the clinic two weeks later to evaluate his blood pressure (BP). His BP is 158/106 and he admits that he has not been taking the prescribed medication because the drugs make him "feel bad". In explaining the need for hypertension control, the nurse should stress that an elevated BP places the client at risk for which pathophysiological condition?

 - Stroke secondary to hemorrhage

3. The nurse observes an unlicensed assistive personnel (UAP) positioning a newly admitted client who has a seizure disorder. The client is supine and the UAP is placing soft pillows along the side rails. What action should the nurse implement?

 - Instruct the UAP to obtain soft blankets to secure to the side rails instead of pillows.

4. An adolescent with major depressive disorder has been taking duloxetine (Cymbalta) for the past 12 days. Which assessment finding requires immediate follow-up?

 - Describes life without purpose

5. A 60-year-old female client with a positive family history of ovarian cancer has developed an abdominal mass and is being evaluated for possible ovarian cancer. Her Papanicolaou (Pap) smear results are negative. What information should the nurse include in the client's teaching plan?

 - Further evaluation involving surgery may be needed

6. A client who recently underwent a tracheostomy is being prepared for discharge to home. Which instructions is most important for the nurse to include in the discharge plan?

 - Teach tracheal suctioning techniques

7. In assessing an adult client with a partial rebreather mask, the nurse notes that the oxygen reservoir bag does not deflate completely during inspiration and the client's respiratory rate is 14 breaths / minute. What action should the nurse implement?

 - Document the assessment data
 - Rational: reservoir bag should not deflate completely during inspiration and the client's respiratory rate is within normal limits.

8. During shift report, the central electrocardiogram (EKG) monitoring system alarms. Which client alarm should the nurse investigate first?

 - Respiratory apnea of 30 seconds

9. During a home visit, the nurse observed an elderly client with diabetes slip and fall. What action should the nurse take first?

 - Check the client for lacerations or fractures

10. At 0600 while admitting a woman for a scheduled repeat cesarean section (C-Section), the client tells the nurse that she drank a cup of coffee at 0400 because she wanted to avoid

Response Summary

PAGE: INSIDER SURVEY

1. What did you like about Hesi Study Insider? What "worked well"?

1. Good review, tough questions
 2. I did Hesi Study Insider for one day, and took the Exam the following day, and passed. I used my gut feeling as Clair suggested, out of forty-five students only two people passed, myself and one other person, it was her six times taking the Exit, and it was my second time taking the Exit, thank you very much Clair.
 3. I really loved the format. When I went to take my Hesi exit exam it was the same format so there were not surprises. A lot of other students were surprised by the fact that there were 160 questions but I was expecting this thanks to Hesi Insider.
 4. similar type of questions
 5. The questions are very similar to the real hesi, so taking them over and over is really helpful
 6. The questions were set up a lot like actual Hesi questions!
 7. The practice test questions are really great and "HESI like", you really get to know how to take the HESI.
